2018-2019 Catalog Year

The Bachelor of Applied Arts and Sciences (BAAS) program is designed to provide a clear path to a four-year baccalaureate degree for community college students with technical or applied degrees or transfer students with technical, applied, or military credits from approved institutions. By accepting many workforce/technical/military credits, the BAAS maximizes the number of hours credited towards the UNT degree. The major in this program—applied arts and sciences—combines an occupational specialization with concentrations across UNT to create a degree specifically oriented to the student's career goals.

Graduates of the BAAS program use their degrees to break through promotional barriers in existing jobs or to change careers altogether. Alumni of the BAAS program have pursued careers in a variety of areas including business, industry and public service. Student Services Counselors assist students with developing a degree plan which addresses their career objectives.

The Bachelor of Applied Arts and Sciences consists of 120 college credit hours. The degree requires 42 hours of academic foundation courses, 66 hours in the major and 12 hours of general electives. For more information, visit our website at baas.unt.edu

MAJOR REQUIREMENTS

PROFESSIONAL FOUNDATIONS (9 Hours)

Consists of 9 hours of foundational courses that teach students to effectively locate and analyze information, to collaborate with diverse groups of people, and work well within organizational systems. A minimum 2.0 grade point average is required for the Professional Foundations component. Students must earn a "C" or better in each of the courses in this component to receive credit.

- BAAS 3000 Pathways to Civic Engagement
- BAAS 3020 Inquiry and Discovery
- BAAS 4980 Managing a 21st Century Career

OCCUPATIONAL SPECIALIZATION (21 Hours)

Comprised of courses related to a specific occupation, field or subject. The occupational specialization typically consists of field-specific course work completed for an Associate's of Applied Science (AAS) degree at a community college. Active-duty military or veterans may receive credit for technical or other formal training courses under this component of the degree plan. Students who have not completed an occupational specialization through courses taken in a community college or in the military may create one by selecting a primary area of study approved in consultation with their academic advisor and the BAAS Program coordinator.

PROFESSIONAL DEVELOPMENT CONCENTRATIONS (36 hours)

Consists of two to three multidisciplinary concentrations of courses which serve to enhance the skills a student has already acquired through prior training/experience and have complimentary themes of interest. Students have the option of working with their academic advisor and the baas coordinator in selecting these concentrations using the traditional BAAS plan or they may choose two concentrations with one being a formal 24-hour Focus Area developed (in collaboration with other UNT academic departments) for specific career directions or fields of study.

The BAAS currently has the following Focus-Area options:

- Aviation Operations
- Computational Linguistics
- Leadership Development
- Public Safety
- Digital Language Curation
- English as a Second Language
- Logistical Operations
- Homeland Security
